March 10, 2015

File No.: 770.12669

Peter Foy, Chairperson  
Ventura County Transportation Commission  
950 County Square Drive, Suite 207  
Ventura, CA 93003

Dear Chairperson Foy:

At the Ventura County Transportation Commission's last meeting on March 6<sup>th</sup>, I briefly answered questions regarding traffic collision rates within the US 101/State Route 23 construction zone. I offered to provide more detailed information in advance of the Commission's next scheduled meeting on April 5<sup>th</sup>.

Our staff has prepared the attached graph showing total freeway related collisions investigated by the California Highway Patrol within the above referenced construction zone. The graph contains monthly information for 2013, 2014 and the first two months of 2015. It is my understanding that significant construction began in March, 2014.

I plan on attending the next Commission meeting and will be happy to either answer questions regarding the attachment or make a brief presentation regarding collision statistics. Please let me know which you prefer.

Sincerely,

A handwritten signature in blue ink, appearing to read "R.D. COHAN".

R. D. COHAN, Lieutenant  
Commander
